

--PRESS RELEASE--

September 14, 1998

Oxnard, CA-

Predicated upon the Internal Revenue Service's acceptance of the Practitioner PIN Pilot Project proposal for industry partnership, Atilla M Taluy announced today that tax practitioners, now would be able to provide paperless e-filed returns to their clients through www.FileYourTaxes.com.

This Project will allow the taxpayers, who elect to participate sign their electronic returns by personally entering a five digit, self selected, one time use Personal Identification Number (PIN). The Electronic Return Originators (ERO)/Preparer signs the return with his/her PIN, which is a combination of the Electronic Filing Identification Number (EFIN) and an additional set of five characters to create a unique ERO signature.

Atilla said, "In the past, in most cases, all e-filed returns had to be followed up by a signature document referred to as the Form 8453. Many of the practitioners and taxpayers, justifiably perceived this paper portion of the return to be defeating the spirit and the intent of e-filing. In mitigating this perceived deficiency, Internal Revenue Service (IRS), with proper authority introduced the Practitioner PIN Pilot project, applicable to a great majority of returns. We are proud and very pleased to be an industry partner to the IRS in this pilot project through our online service at <http://www.FileYourTaxes.com>."

All members of the practitioner community who are EROs are allowed and encouraged to submit their application to us, for acceptance by the IRS to participate in this novel Pilot Project. Atilla recommended that, "Those wishing to participate in this Project must submit their applications to us as soon as possible so as to meet the October 8, 1999 deadline. The IRS will determine the acceptability of the applicants submitted through us."

The concept of this program was well received by the attendees of the IRS Nationwide Tax Forum held in six different locations throughout the United States, consisting possibly of a total audience of over 10,000 practitioners. "This is one of the most significant innovations created to benefit the tax practitioners." Said Atilla.
