

PRESS RELEASE

1 - 1 - 1

February 16, 1999

Oxnard, CA - Today, Atilla M. Taluy, President of Atilla M. Taluy Tax and Bookkeeping Service announced that the first three weeks of operation for

<http://www.FileYourTaxes.com>

were a phenomenal success, assisting an unprecedented number of taxpayers.

“We attribute this growth to the fact that our site provides a very user friendly and easy to use system. We combined decades of tax practice and electronic filing experience with the most appropriate computer technology and designed this system from the ground up to specifically address the needs and desires of the online client. We did not try to force a pre-existing, hastily modified software product upon the taxpayer. With our system, no software has to be bought, installed, learned, debugged, or upgraded, and we don't charge additional fees for electronic filing. This option is free for anyone who pays to use our system,” said Taluy.

Other contributing factors included the capability to offer the "Paperless Tax Return" and ACH Debit options. Both are being premiered by the IRS this year, and only available through a system such as FileYourTaxes.com. All of these amenities are made available to the taxpayer for as low as \$9.00.

As a public service to internet users, essential tax return information is provided free of charge before any payment information is requested. Those individuals who wish to check their own calculations are welcomed guests of the system.

Atilla M. Taluy expresses deep gratitude to those who have made the site a success and invites all individuals to visit and enjoy the benefits of
