

--PRESS RELEASE--

August 17, 1998

Oxnard, CA-

Atila M. Taluy announced that the IRS has presenting two innovations of interest for the 1998 tax season. The first will provide for the taxpayers to make their payments online as an electronic debit from their financial institution accounts. This option will be referred to as ACH Debit and will eliminate the need for a written/paper check. The second innovation is a pilot program which will give taxpayers the ability to file a "Paperless Tax Return" using a personal identification number called the Customer Service Number (CSN). The CSNs will be issued by the IRS to several millions of taxpayers.

FileYourTaxes.com intends to implement both of these innovations, and to be a key participant in the first ever-Paperless Tax Return pilot project.
